github.com/Franklyn-R-Silva

Arapiraca, AL — Brasil

## PROFILE

Mobile developer specialized in Flutter/Dart, with a Computer Science degree from UFAL. I build Android apps with clean architecture and real backends (Supabase, Firebase, REST), plus full-stack experience (Java/Spring, Node, React).

## EXPERIENCE

### Mobile Developer · NWERP

Out 2025 - Atualmente

Building mobile apps in Flutter/Dart — from design to store release, focused on performance, UX and maintainable code.

### Systems Analyst · Grupo Coagro

Jul 2024 - Atualmente

Building and maintaining internal systems and integrations, automating processes and cutting the team's manual work.

### Full-stack Developer · Plussoft

Jul 2023 - Dez 2023

Full-stack development of web systems (front and back-end), delivering features from concept to production.

### Systems Analyst · Open Consult

Jun 2023 - Jul 2023

Systems analysis, support and evolution, with continuous improvements and problem-solving.

### OOP Teaching Assistant · UFAL

Set 2022 - Fev 2023

Object-Oriented Programming teaching assistant: supported students and graded work, reinforcing OO fundamentals.

## PROJECTS

### Pokedex — [github.com/Franklyn-R-Silva/Pokedex](https://github.com/Franklyn-R-Silva/Pokedex)

React · Typescript · Vite.js · Html5 · Css3 · Supabase

Pokédex is a single-page web app that consumes the public PokéAPI to search, browse, and deep-dive into all 1025 Pokémon. Beyond the classic Pokédex, it adds a TCG cards explorer (real trading cards, rarity, and market price), a turn-based team battle mini-game, and a TCG deck builder with analytics and legality checks. The framework-agnostic logic (data services, domain rules, i18n, feature widgets) is shared with the original vanilla build; this branch ports the UI to React 19 + TypeScript (strict). The interface is fully bilingual (PT-BR / EN) — since the PokéAPI has no Portuguese, prose is machine-translated on the fly and cached locally. Ships as an installable PWA with offline support and is deployed on Cloudflare Pages.

### sentimento\_app — [github.com/Franklyn-R-Silva/sentimento\\_app](https://github.com/Franklyn-R-Silva/sentimento_app)

Flutter · Dart · Supabase · PostgreSQL

Mental wellness app (Flutter + Supabase): mood & goal tracking, progress charts, guided breathing and WhatsApp integration. Realtime auth & database.

### drawer\_rail — [pub.dev/packages/drawer\\_rail](https://pub.dev/packages/drawer_rail)

Flutter · Dart · Package

Reusable open-source Flutter component: collapsible, themeable navigation drawer/rail with search, sections, badges, expandable groups and flyouts.

### Flutter Web Portfolio — [github.com/Franklyn-R-Silva/Portfolio](https://github.com/Franklyn-R-Silva/Portfolio)

Flutter · Dart · UI/UX

Interactive Flutter Web portfolio with clean architecture, provider pattern, magnetic physics, glassmorphism and holographic 3D cards.

## EDUCATION

B.S. in Computer Science — Federal University of Alagoas (UFAL)

## SKILLS

### Mobile

Flutter, Dart, React Native, Java (Android), Kotlin, Swift, Android Studio

### Web & Back-end

TypeScript, Node.js, Docker, PostgreSQL, Spring Boot, JavaScript, Oracle, Electron, MySQL, HTML5 & CSS3, Tailwind CSS, Bootstrap

### Tools

Supabase, Git, GitHub, VS Code, Postman, Figma, FlutterFlow, Xcode, Linux

## CERTIFICATIONS

- Flutter & Dart - The Complete Guide (Udemy)
- Clean Architecture em Flutter (Udemy)
- Ignite - React Native (Rocketseat)

## RECOMMENDATION

"Franklyn has a deep understanding about Object-oriented Programming!"

— Thiago Bruno De Sales, Senior Mobile Software Engineer · supervised at UFAL
